

Targeted Individuals are forced to endure non-stop unimaginable emotional and physical trauma that is omnipresent, highly organized, precisely customized to the specific victim, extraordinarily intense and usually involving physical attacks on the victim's body and/or mind via classified military directed energy weapons.

The protocols used are highly disruptive and specifically designed to make even the most solid citizen look as if they have become delusional. Up until now, there has been no recourse, and few are released from the "program".

Many targeted individuals are whistleblowers, but more and more people are being targeted who have no idea why they were blacklisted.

Are You Participating With Covert No-Touch Torture Programs?

Whether you are aware of participating or not, you can receive a prison sentence of 5 years and potentially more if you engage in the collaborative stalking and harassment of a UK citizen.

These are heinous Crimes Against Humanity (defined as "a systematic attack against a civilian population") as well as War Crimes (as put forth by Article 32 of the Geneva Convention).

Targeted Justice is collecting evidence of these crimes from numerous persons, and will be pursuing justice for all through legal channels.

Protect yourself by refusing to participate in criminal behavior.

The Weapons

The following describes the weapons of war being used on innocent citizens:

- High-powered directed energy beams called magnetrons installed on cell phone towers that track Targeted Individuals 24/7 and can target organs at a distance, causing illness and/or death.
- Computer systems capable of reading a person's mind and correlating brain waves on an electroencephalograph (EEG) with specific commands.
- Technologies that induce sound into the brain, monitor and alter brainwaves, alter behavior, induce images into the brain, and disrupt the calcium ions binding on individual cell surfaces—all from a distance and essentially creating pain and other effects anywhere in the body.
- High-powered electromagnetic generators that interfere with human brain waves in order to invade the mind and short circuit its synapses. It may be used to disorient entire crowds, or to manipulate individuals into self-destructive acts.

The patents for all of these weapons can be viewed at www.targetedjustice.com.

In the News

Over the years there have been major media news reports regarding the targeting and use of electromagnetic weapons on innocent citizens. The most recent are below:

1. From December 2016 to January 2017, personnel of the U.S. embassy in Cuba sought medical treatment for various symptoms, including headaches, ear pain, dizziness and hearing problems.

These symptoms were associated with the peculiar onset of unusual sounds or auditory sensations described as: a high-pitched beam of sound; an "incapacitating sound; and just an intense pressure in one ear.

These attacks have been linked to directed energy weapons using sonar waves that were either super-loud or inaudible.

2. On May 23, 2018, the U.S. embassy in China released a health alert, claiming that a U.S. government employee in China had reported subtle and vague—but abnormal—sensations of sound and pressure.

Although the statement clarified that the United States did not know what caused the reported symptoms, nor was aware of any similar situations in China—either inside or outside of the diplomatic community—the

U.S. government sent a warning message to all its citizens in China, and instructions on what to do if symptoms were occurring.

3. A 2017 New York Times story by Ronan Farrow details methods used by high profile Hollywood producer Harvey Weinstein in order to silence actresses who he had sexually harassed.

The article pointed to two private security contracting agencies that Weinstein hired to intimidate and threaten the women—Kroll and Black Cube.

These contracting agencies and others like them perform a roster of intimidation tactics designed to completely debilitate the victim: Pervasive, 24/7/365 surveillance in and out of the home; slander/character assassination campaigns designed to destroy interpersonal relationships; stalking and harassment by many agents; vandalism of the home and car; hacking of electronic devices, mail manipulation and much more.
